

KÜTTNER as an engineering company founded in 1949, has evolved into a group of companies active worldwide in engineering turnkey processes.

The fluidised bed technology offers a broad range of applications. KÜTTNER applies this technology for many different purposes, for example for the combustion of industrial and municipal sludge.

### For various energy uses:

#### Heat and Power Generation:

- ▶ Thermal oil boilers with ORC modules
- ▶ Steam boilers with
  - Steam motors
  - Condensing turbines
- ▶ Microgasturbines, etc.

#### Heat Generation:

- ▶ Steam generation
- ▶ District heating
- ▶ Heat exchangers for drying processes, etc.
